

**Some
people
were just
born with
a great
smile...**

...while others aren't so lucky. If you are one of those people that isn't happy with their smile, you may want to look into cosmetic dentistry.

Dr Angie Papas suggests Cosmetic Dentistry as a way to achieve the smile you have always wanted. Cosmetic options offered range from teeth whitening, bonding, regular braces or invisalign, tooth contouring, dental implants, composite or porcelain veneers, crowns and bridges.

Dr Papas often sees her patients pleased with their new, winning smile. In a competitive world where it's sometimes hard to keep on top of everything, it makes good sense to employ every advantage at your disposal to achieve the best smile you can.
